

## QUALITY ASSURANCE POLICY

Date: March 2014

ENERTIS SOLAR is a global firm of Consultancy, Engineering and Quality Control, leader in the solar PV sector internationally. Our mission is to guarantee the maximum return for our clients and a proper management of their project risks through the provision of high value added and innovative services.

Our vision is to consolidate ourselves as a Global Leader in providing services of consultancy, engineering and quality control in the Renewable Energies sector, through innovative services, contributing to the fostering of Renewable Energies as a sustainable alternative of electric generation around the world.

ENERTIS SOLAR, as a private company, has the purpose to obtain the maximum return with its activities and for that, it considers essential the commitment of all its effort to the following points:

- Fulfill the requirements agreed with the Client.
- Fulfill the legal requirements in force.
- Ensure the continuous improvement of the processes.
- Ensure the highest level of client satisfaction.

Supporting these goals, the Management Board of ENERTIS SOLAR takes a strategic decision for the progression of the company, developing and implementing a quality management system for the company (ISO 9001), as well as a management system for the lab (ISO 17025), in order to ensure the quality and the continuous improvement of the company activities.

The activities and test included under these systems are the following:

### ISO 9001

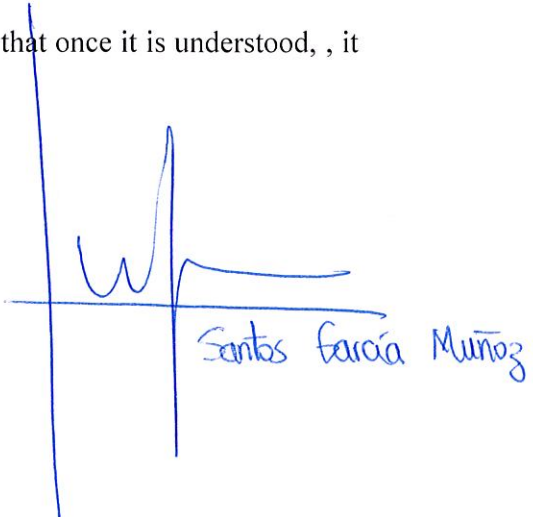

- Consultancy
- Technical assessment of solar PV installations and monitoring systems.
- Engineering of solar PV projects.
- Engineering of monitoring systems.

### ISO 17025

- Testing of solar PV modules.
- Testing of solar PV installations.

As a result, the Management Board of Enertis Solar is committed to train and inform all Staff about the quality documentation in order to be implemented at work and achieve the fulfillment of the clients requirements, internal policies of Enertis, legal and regulatory demands, as well as the continuous improvement of the management system efficiency.

This policy will be distributed to all Enertis Solar staff, so that once it is understood, , it is applied and reviewed for its continuous improvement.
